Raised Floors

Carton Flow

It doesn't matter whether you want to feed fast movers in trays, cartons or hard plastic totes to the stock-picking zone in a First-In-First-Out configuration, our Carton Flow system guides all the items into the correct lanes.

With a wide range of configurations and components it is possible to implement often even the most complex of storage and stock-picking set-ups. The Carton Flow system is easy to assemble and maintenance-free and pays for itself in next to no time.

Cantilever Racking >

§ Cantilever racking is ideal for the storage of long loads such as beams, profiles, pipes, timber, etc.

Light Racks →

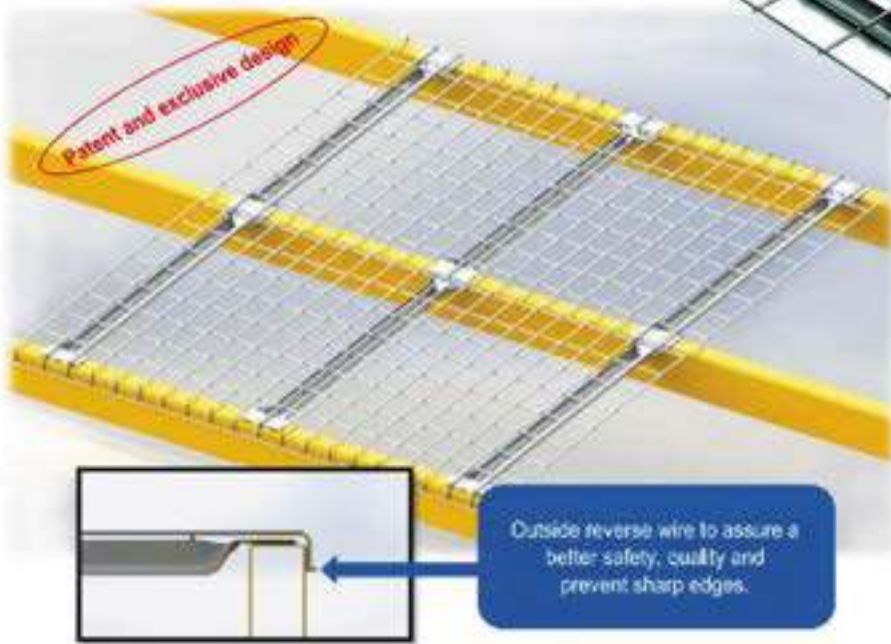

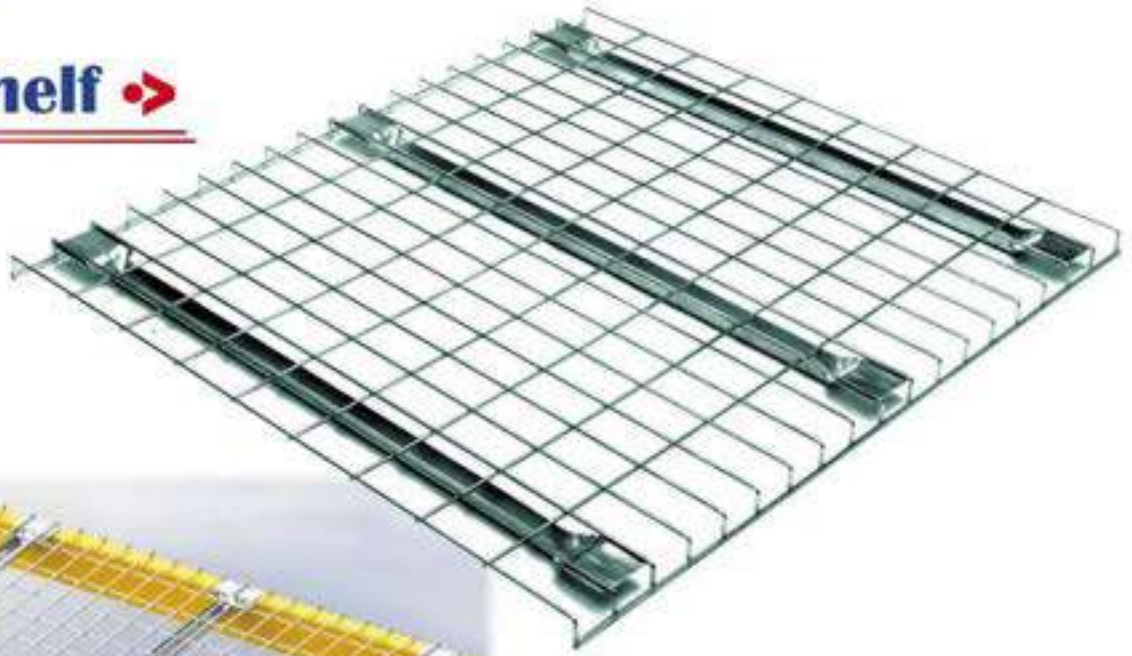

- § New compact design.
- § Extremely easy, boltless assembly.
- § Modular system permitting a wide variety of combinations.
